

# DAN-EX

Dual Expanding Plug Valve  
Made in the USA

## Fire tested to API 607 specifications

The DAN-EX 3" and up Class 150 and 300 Expanding Seal Valve. Have been fire tested in accordance with ISO 10497:2004(E). All tests conformed to the temperature, duration and pressure requirements of the specification. The DAN-EX withstood the intense temperatures of up to 1700°F - with body temperatures reaching as much as 1400°F, and performed as designed. Our valve maintained less than half of the allowable rates for both low and high pressures.
